WATER CONSERVATION POLICY

PREAMBLE

Water is so essential for life that it's simply impossible to imagine life without water. India has 16% of the world's population and only 4% of the world's water resources are available for use, and that too is depleting rapidly. The demand for water is expected to grow from 40 billion cubic meters (bcm) currently to around 220 bcm in 2025. The uneconomical and unethical use of water by human beings is the sole reason for the exploitation and deterioration of this valuable natural resource. Thus, both the quality and quantity of water are at stake and have to be taken care of. It's the moral duty and social responsibility of each individual and community as a whole to contribute to conserving water and rejuvenating water resources. In this direction, our institute has made efforts to ensure water conservation.

OBJECTIVE

The institution has designed the water conservation policy to achieve the following objectives:

- To create awareness amongst students and staff members to prevent wastage of water.

- To have a system to store and use rainwater
- To educate housekeeping staff on the reuse of Water.

THE POLICIES:

1. Awareness to students and staff members:
 - The institute organizes events on the importance of Water Conservation
 - The institute has to put up posters to educate the stakeholders to prevent the wastage of water.
2. Water Reuse by housekeeping:
 - The non-contaminated (detergent-free) water should be used for watering plants and other cleaning purposes.

Hence, the institution aspires to effectively minimize water wastage and its optimum utilization by conserving, filtering, and reusing water by implementing the water conservation policy.
